

Rotary Club of Centennial Colorado

Centennial, Colorado August 23, 2016

The City of Centennial is ahead of other cities in the area in installing a fiber infrastructure. The city was forward thinking in financing this project as infrastructure which other cities in the area did not do.

Construction will start in the 4th quarter of this year. The initial construction is to provide the fiber infrastructure to businesses and emergency services. Construction would then move to residences.

ATTENTION: Embassy Suites will be closed for construction during the month of September. Centennial Rotary will be meeting at the offices of the Arapahoe County Sheriff.

Karen Berry and Shirl Mabary were inducted into the club. Congratulations.

Centennial Councilman Kenneth Lucas, top picture, and Tim Scott, Director of Fiber Infrastructure for the City of Centennial, lower picture, were our speakers talking about the Fiber Infrastructure project for the City of Centennial. The City of Centennial has pipes in the ground they are taking advantage of by installing fiber optic cable in the pipes. Like road and bridges, which are classified as infrastructure, Centennial is building a fiber infrastructure. This fiber infrastructure would then be available to be leased to private companies. This would be a benefit to the private company as they would not have to install the fiber network and an advantage to Centennial as a source of revenue.

Rotary Minute: John Peterson gave the Ro-
tary Minute. He gave the following quote
from Paul Harris: *“Individual effort when well
directed can accomplish much, but the greatest good
must necessarily come from the combined efforts of
many men. Individual effort may be turned to indi-
vidual needs but combined effort should be dedicated
to the service of mankind.”*
