

# Rotary Club of Centennial Colorado

Centennial, Colorado

July 24, 2018

Sandy Mortensen, District 5450 Governor, was our guest speaker. Sandy has lived in Colorado and Summit County since 1977.

The purpose of the District is to give support to the clubs in the District. She encourages members to become active in the District because it provided opportunities. Opportunities that can be transferred to business and the family. It also provides opportunities to network.

As Rotarians we activate, persevere, partner, plan, organize, mobilize, motivate, teach, communicate, listen, guide, strategize, mentor, elevate, shine, dignify, voice, enable, rally, resolve, educate, lead, unite, connect, and inspire.

Rotary provides a lot of training that members can take advantage of throughout the year. There is a lot of training available through the Rotary.org web site. On September 15 there is a training workshop at the Front Range Community College.

One change that Sandy has made is in the District newsletter. It used to be about 12 pages and most people didn't want to read something that long. It is now about a page and a half with a lot of links so you can find out more details on what interests the reader.

## BUSINESS MINUTE

Jay Weber gave the Business Minute this week. Jay is involved in developing voice of internet software. His company was recently purchased by CISCO.

## CLUB ANNOUNCEMENTS

- Samantha Johnston announced there will be food drives on Aug 18 and October 20 at the King Soopers at Parker and Arapahoe Roads. She is looking for help in running these food drives as she is in training for a new job on those dates.
- Jeanne Henschen announced that the recent press about a fungus affecting the peaches will not have an effect on our peaches. Here is additional information on the fungus. Some of our trees have this cytospora canker and it does shorten the life span of the trees. In the winter we cut down many trees that are severely damaged. When projecting our volume, we are basing it off healthy trees. Also, we rarely plant "New" varieties because we prefer the older varieties and they also seem to be more resistant to the canker. This fungus has been around since I can remember, and we deal with it every year. Our crop is beautiful this year and moving along just as expected and our volume is just as we predicted. I read the article and it makes it sound so terrible when it is something the farmers have been dealing with for many years. The taste and quality of our peaches will be as wonderful as it has been for the past 38 years. Hope this helps to ease everyone's minds.
- John McCarty gave an update on the Madagascar wells. Engineers without Borders put in two wells and one was dry. They are responding to correct the problem. The other well is working fine but there is just one well for 2,000 people.

## 2018-2019 Club

### Officers

President—Time Eunice  
Past President—John Berry  
Secretary—Karen Berry  
Treasurer—Barbara Medina  
Sergeant at Arms—Allen Jackson  
Past Elect—Samantha Johnston
